

Payroll Function Effectiveness

We look at your payroll function through a number of lenses

Many organisations find it quite challenging managing the ever changing employment, tax and social insurance legislation affecting the accuracy and integrity of their payroll process. An organisation opting to internally manage its payroll function needs to properly assess and address the inherent people, processes and data security complexities affecting the payroll process.

Looking at payroll through different lenses

Our Payroll Function Effectiveness services go a step beyond and examine whether your payroll function has the required governance, internal controls, information technology and data security environment to safeguard the accuracy, confidentiality and integrity of your payroll data.

At PwC, we look at your payroll function through a number of lenses.

Our specialised team consists of experts with extensive knowledge and technical expertise in a wide spectrum of competencies such as Payroll Outsourcing, Personal Taxation and Social Insurance, Employment Law, People, Internal Controls Optimisation, Information Technology and Data Assurance.

At PwC, we invest heavily in our people, processes and systems to play an important role in keeping you and your organisation safe in what has become a very complex and continuously evolving regulatory and operating environment.
