## “ Message from Leadership

Welcome to our FY22 Transparency report.

At PwC, our purpose is to build trust in society and solve important problems. We are a network of firms in 152 countries, with more than 327,000 people who are committed to delivering quality in assurance, advisory and tax services. Core to this purpose is our commitment to continuously drive a strong culture of quality and excellence.

Our FY22 Transparency Report includes information about how PwC Cyprus is governed, as well as updates from the Head of our Assurance Services, Yiangos Kaponides. While PwC is a multidisciplinary firm, this report primarily focuses on our audit practice and related services. As the audit profession continues to be under significant public scrutiny, we understand the concerns and remain committed to supporting the changes that will improve audit quality.

In June 2021, we unveiled The New Equation, PwC's landmark global strategy which responds to fundamental changes in the world, including technological disruption, climate change, fractured geopolitics, and the effects of the COVID-19 pandemic. The New Equation is based on analysis of global trends and thousands of conversations with clients and stakeholders. It builds on more than a decade of sustained revenue growth and continued investment. The New Equation focuses on two interconnected needs that clients face in the coming years. The first is to build trust, which has never been more important, nor more difficult. The second is to deliver sustained outcomes in an environment where competition and the risk of disruption are more intense than ever and societal expectations have never been greater.

As part of "The New Equation", our global strategy, the PwC network is making an incremental US \$3bn investment in quality. This includes a \$1bn investment in a multi-year program to deliver a new audit ecosystem - human-led, tech-powered and data-driven. This will enable us to make continuous improvements to audit quality by further standardising, simplifying, centralising and automating our audit work, transforming the experience of our clients and people. For more information on "The New Equation", please visit <https://www.pwc.com/gx/en>.

PwC Cyprus remains the leading organisation in the professional services sector, achieving net revenues of €83m in FY22, whilst continuing to invest in upskilling our People, in upgrading our technology and in enhancing the quality of work. Our total contribution to government revenues including income tax, special contribution for defence, PAYE, VAT, GHS and social insurance contributions was €31m. We attribute these results to our continuous investments in organisational innovation and new technology to support our services across the firm, and also to enhance the quality of our audit services.

In an environment where society's expectations are growing on a daily basis and challenges are continuing to emerge in an unprecedented manner, it is more important than ever that we maintain an unwavering commitment to quality. This is why, as a network of firms, we are constantly striving to enhance

the quality of our work and also to meet and exceed the expectations of our stakeholders, whilst building trust in society. Our approach to building trust is designed to meet rising expectations of transparency, accountability and stakeholder engagement. It combines expertise in audit, tax and compliance activities with a drive to expand specialist capabilities in areas such as cyber security, data privacy, Environmental, Social and Governance (ESG) and Artificial Intelligence (AI). It also recognises the importance of quality - and that reporting and compliance represent just one link in a chain that includes organisational culture, executive mindset, aligned standards, certified professionals, stringent controls, tailored technologies and appropriate governance.

Similar to building trust, delivering sustained outcomes requires us to work in an integrated way. Instead of taking a traditional technology-driven approach to transformation, PwC focuses on the outcomes that our efforts are seeking to achieve. To deliver the agreed outcomes, we then mobilise our expertise in areas including - among many others - strategy, digital and cloud services, value creation, people and organisation, tax, sustainability, reporting, deals, business recovery services, legal and compliance.

Our People are the heart of our organisation. During FY22, as part of our absolute commitment to our People, we introduced a revamped People Value Proposition, pushed forward with our leading-edge flexibility and hybrid working practices, engaged in transparent and authentic communications and continued fostering an environment of inclusiveness, diversity, psychological safety, innovation and personal growth.

We will continue our exciting growth journey towards a sustainable and future-fit model, inspired by "The New Equation". We are strongly placed to support our clients, both in the private and public sectors, to successfully devise and implement their own transformation agendas, earn trust and achieve sustained outcomes, whilst maintaining the quality of work at the highest levels - a responsibility shared by everyone at PwC. This report is a description of how we bring together our culture, people, values and processes to meet our audit quality objectives.

**Philippos Soseilos**  
CEO & Chairman

## Message from Assurance Leader

Our Assurance practice sits in the centre of our strategy in building trust. Quality in whatever we do is core to our purpose and remains at the heart of our strategy in Assurance.

FY22 has been a year of both tremendous challenges and opportunities for our people, clients and communities. COVID-19, the war in Ukraine, geopolitical strains, supply chain disruption, skills and workforce shortages, inflation, energy transition complexities and the ongoing need to digitise are just a sample of the challenges and opportunities we are all faced with. These challenges and opportunities have demanded a lot from PwC and our clients' teams.

It was our focus on our people, and their trust in us, that allowed us to navigate the disruption. With the tools, processes and guidance we provided, our audit teams continued in FY22 to deliver quality each and every time focused in addressing the needs of our society, clients, regulators and other stakeholders. As a firm, we continued to focus on the important role we play as auditors in helping to facilitate transparency and instil confidence in the capital markets.

One of the ways we build trust and transparency in the capital markets is by us being transparent. That's why we're pleased to present our Transparency Report for FY22, which shows how we maintain quality in our audit work. The report describes our policies, systems and processes for ensuring quality, which include key quality monitoring programs and reviews, and the way we foster a culture of quality at every level of our firm. It details the EU PIE companies we performed audits for and the total revenue from our audit and non-audit work.

### » Our focus on audit quality

Our audit business is fundamental to our strategy and brand. We continue to invest in continuous improvement in audit quality through new systems and technology, risk processes and learning and development for our people.

Executing high-quality audits and providing professional audit services objectively and ethically to every company we audit continue to be our top priorities and at the core of our commitment to serve the public interest.

To continuously improve our audit quality, we challenge our audit methodology and approach regularly, evaluate all inspection findings and take responsive actions. Furthermore, we believe there are many factors that contribute to a quality audit. To get to a balanced picture of quality, stakeholders need to see a range of measures. This report discloses how we're performing against key measures of audit quality including our internal and external inspection findings.

### » Blending our people with technology to deliver quality

We are empowering our audit teams with advanced, innovative tools, support and guidance. We aim to achieve a perfect blend of people and technology, reimagining the audit and how we bring the best of human and machine intelligence to our clients. Today, we have powerful platforms such as Halo, Aura and Connect that will take us into tomorrow, as we consider how to enhance our use of technology and data in the future to communicate securely and provide better insights to our audit clients.

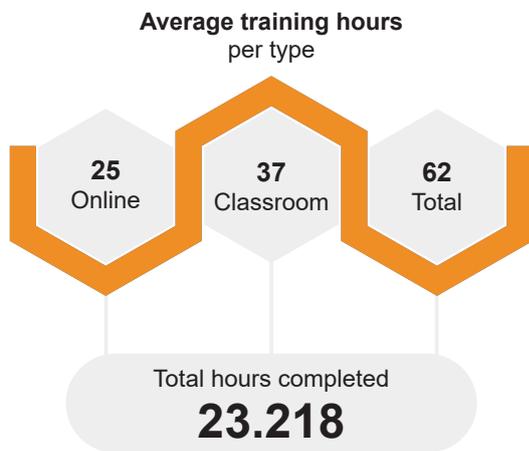

I am proud of the role we are playing in the discussions about audit quality in Cyprus. We will continue to drive audit quality to contribute to the success of our clients and stakeholders.

Yiangos Kaponides  
Assurance Leader

PwC Network

# PwC Network

## Global Network

PwC is the brand under which the member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide professional services. Together, these firms form the PwC network. 'PwC' is often used to refer either to individual firms within the PwC network or to several or all of them collectively.

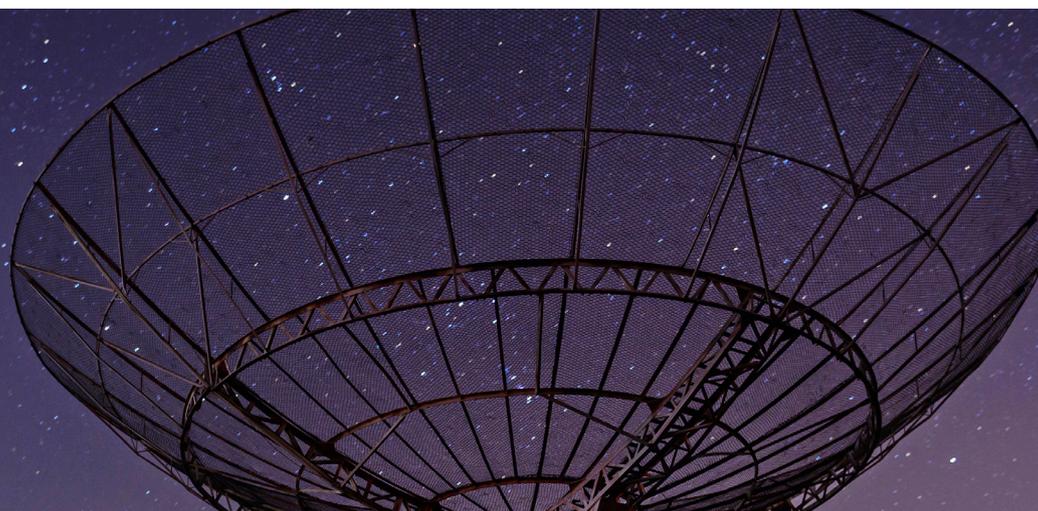

In many parts of the world, accounting firms are required by law to be locally owned and independent. The PwC network is not a global partnership, a single firm, or a multinational corporation. The PwC network consists of firms which are separate legal entities.

### ≡ PricewaterhouseCoopers International Limited

Firms in the PwC network are members in, or have other connections to PwCIL, an English private company limited by guarantee. PwCIL does not practise accountancy or provide services to clients. Rather its purpose is to act as a coordinating entity for member firms in the PwC network. Focusing on key areas such as strategy, brand, and risk and quality, PwCIL coordinates the development and implementation of policies and initiatives to achieve a common and coordinated approach amongst individual member firms where appropriate. Member firms of PwCIL can use the PwC name and draw on the resources and methodologies of the PwC network. In addition, member firms may draw upon the resources of other member firms and/or secure the provision of professional services by other member firms and/or other entities. In return, member firms are bound to abide by certain common policies and to maintain the standards of the PwC network as put forward by PwCIL. The PwC network is not one international partnership. A member firm cannot act as agent of PwCIL or any other member firm, cannot obligate PwCIL or any other member firm, and is liable only for its own acts or omissions and not those of PwCIL or any other member firm. Similarly, PwCIL cannot act as an agent of any member firm, cannot obligate any member firm, and is liable only for its own acts or omissions. PwCIL has no right or ability to control member firm's exercise of professional judgement.

The governance bodies of PwCIL are:

- **Global Board**, which is responsible for the governance of PwCIL, the oversight of the Network Leadership Team and the approval of network standards. The Board does not have an external role. The Board is comprised of 20 members. Two are appointed as external, independent directors, and the other 18 Board members are elected by partners from PwC firms around the world every four years.
- **Network Leadership Team**, which is responsible for setting the overall strategy for the PwC network and the standards to which the PwC firms agree to adhere.
- **Strategy Council**, which is made up of the leaders of the largest PwC firms and regions of the network, agrees on the strategic direction of the network and facilitates alignment for the execution of strategy.
- **Global Leadership Team**, which is appointed by and reports to the Network Leadership Team and the Chairman of the PwC network. Its members are responsible for leading teams drawn from member firms to coordinate activities across all areas of our business.

# 02

Our approach to Quality

# Our approach to quality

## ≡ Definition and culture

At PwC, we define quality service as one that consistently meets the expectations of our stakeholders and which complies with all applicable standards and policies. An important part of delivering against this quality definition is building a culture across a network of 327,000 people that emphasises that quality is the responsibility of everyone including our over 1,000 people. Continuing to enhance this culture of quality is a significant area of focus for our global and local leadership teams and one which plays a key part in the measurement of their performance.

## ≡ Measurement and transparency

For all our businesses, each PwC firm – as part of the agreement by which they are members of the PwC network - is required to have in place a comprehensive system of quality management (SoQM); to annually complete a SoQM performance assessment; and to communicate the results of these assessments to global leadership. These results are then discussed in detail with the leadership of each local firm and if they are not at the level expected, a remediation plan is agreed with local leadership taking personal responsibility for its successful implementation.

As our services change and develop, and the needs and expectations of our stakeholders also change, we are continually reviewing and updating the scale, scope and operations of our system of quality management and investing in programmes to enhance the quality of the services that we provide.

## Specific focus on audit quality

The quality of our work is at the heart of the PwC network and we invest significant and increasing resources in the continuous enhancement of quality across our network. This includes having a strong quality infrastructure supported by the right people, underlying tools and technology at both the network level and within our firm, and a continuous programme of innovation and investment in our technology. The PwC Network's Global Assurance Quality (GAQ) organisation aims to support member firms in promoting, enabling, and continuously improving Assurance quality through effective policies, tools, guidance and systems used to further promote and monitor quality and to build an appropriate level of consistency in what we do.

Each firm is responsible for utilising the resources provided by the network as part of our efforts to deliver quality to meet the expectations of our stakeholders.

### ≡ The QMSE framework

To deliver services in an effective and efficient manner that meets the expectations of our clients and other stakeholders, the PwC network has established the Quality Management for Service Excellence (QMSE) framework for quality management which integrates quality management into business processes and the firm-wide risk management process.

This framework introduces an overall quality objective that is supported by a series of underlying quality management objectives and our system of quality management (SoQM) must be designed and operated so that these objectives are achieved with reasonable assurance.

### ≡ Specific focus on audit quality

Delivering quality audits is core to our purpose. To that end, we are committed to providing a quality audit. However, where our work falls below the standards that we set for ourselves and are set by the regulators, we are disappointed and also rightly

criticised. We take each of these instances very seriously and work hard to learn lessons and to enhance the quality of audits that we undertake in the future.

### ≡ The right objectives and capabilities

To help us put this strategy into effect, the PwC network has established clear objectives around audit quality and provides support to help us meet these objectives. Our engagement teams can only deliver quality audit services if they have access to the necessary capabilities - both in terms of people and technology. That's why our quality objectives focus on having the right capabilities - both at a member firm level and across our network - and on using these capabilities to meet our own standards and the professional requirements. These capabilities can only be developed under the right leadership and quality culture, promoting the right values and behaviours.

### ≡ Integrated and aligned in the right way

The quality objectives focus on having the right people supported by effective methodologies, processes, and technology appropriately directed and supervised. These represent the capabilities that we believe are relevant to achieving and sustaining audit quality. To help us achieve these objectives, there are a number of dedicated functions at a network level that develop practical tools, guidance and systems to support and monitor audit quality across our network. These elements have been integrated and aligned by our network to create a comprehensive, holistic and interconnected quality management framework that we tailor to reflect our individual circumstances.

### ≡ Delivering a quality end-product consistently

Central to the framework is the recognition that quality management is not a separate concept; it needs to be embedded in everything we do as individuals, teams, firms and the network. The quality objectives are supported by designated key activities which are considered necessary

to achieve the quality objectives, focused mainly on building a quality infrastructure and organisation. We supplement and design those key activities as appropriate to respond to risks we have identified to achieve each quality objective.

### ≡ Values and judgements

Performing quality audits requires more than just the right processes. At its core, an auditor's role is to assess with a "reasonable" degree of assurance whether the financial statements prepared by the company's management are free of "material misstatements" - reaching a professional judgement on whether the financial statements present a fair picture of the company's financial performance and position. To carry out this assessment effectively, the auditor needs to use all the capabilities that have been built up in line with our quality objectives. These include applying ethical behaviour in accordance with PwC's values, professional scepticism, specialist skills and judgement - all supported by technology.

## Navigating the impact of external factors on our system of quality management

The past several years have seen unprecedented challenges. From the global COVID-19 pandemic to the Russian government's invasion of Ukraine (hereafter referred to as 'the war in Ukraine'), these events are first and foremost human tragedies. Our SoQM reflects our response to these events and changing risks based on impacts to our client, our people and the way we operate, including new or revised policies and procedures in our firm that have been implemented or are under consideration at any given point in time. Under the QMSE framework, our SoQM is designed and operated to consider changes in facts and circumstances resulting in:

- New or changing quality risks to achieving one or more of the quality objectives
- Changes to the risk assessment of existing quality risks
- Changes to the design of the firm's SoQM, including the risk responses

The QMSE framework has helped us navigate the changes in our firm's environment, by assessing the completeness and effectiveness of our responses including any additional monitoring to be put in place, and identifying any gaps to address new or emerging quality risks.

### ≡ Sharing developments and experience COVID-19

From the early stages of the pandemic, the PwC network put a team in place to monitor developments globally and to highlight areas of critical importance to ensure we did not compromise on audit quality and more than two years into the pandemic, we have maintained our focus on those areas impacting our clients, our people and how we work. We have leveraged the guidance developed by our network to provide sustained, consistent leadership and guidance on audit quality and equip our teams to consider their client's unique circumstances and respond accordingly.

The COVID-19 pandemic resulted in us facing a number of new challenges in our audits. This ranged from how we operate as a team to plan and complete the audit, to how we interact with our clients to obtain the necessary audit evidence and execute specific audit procedures such as completing physical inventory counts.

### ≡ Our network's response to the war in Ukraine including separation of PwC Russia and Belarus and our approach to sanctions

Following the Russian government's invasion of Ukraine, the PwC network's main focus continues to be doing all we can to help our colleagues and support the humanitarian efforts to aid the people of Ukraine.

The PwC network's response to the war in Ukraine resulted in several actions including the decision that, under the circumstances, PwC should not have member firms in Russia and Belarus and consequently PwC Russia and PwC Belarus have exited the network.

In addition, the PwC network is exiting work for Russian entities and individuals subject to sanctions. Any sanction on Russian entities and individuals that is passed anywhere in the world will be applied everywhere in the PwC Network. As of October 2022, our firm exited work for Russian entities and individuals subject to sanctions. The PwC network will also not undertake any work for the Russian Federal Government or State-owned Enterprises and is also conducting reviews to identify engagements with non-sanctioned Russian clients and considering the appropriateness of any ongoing relationship. Our network's response to the conflict including the separation of PwC Russia and PwC Belarus and approach to sanctions, as well as consideration of the broader risks that impact our clients are being factored into our firm's SoQM through the identification of potential quality risks that have or may arise. Our firm is monitoring the actions we have and will take to address the identified risks to assess whether further changes are needed to our firm's SoQM or how we perform our engagements and interact with our clients.

# 03

Cultures and values

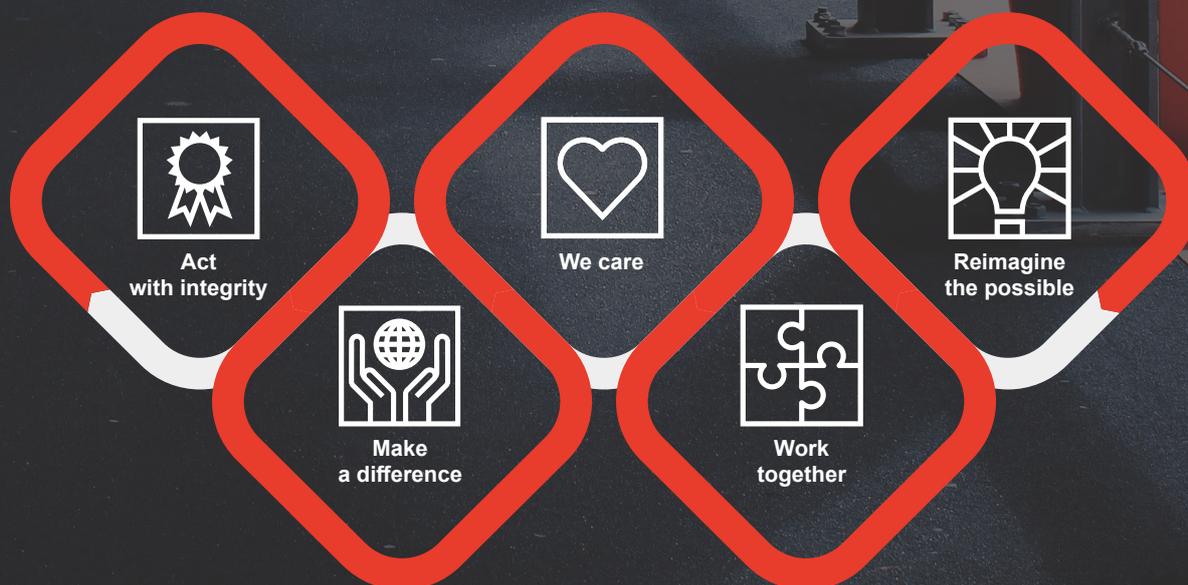

## Our purpose

is to build trust in society and solve important problems.

## Our values

define who we are, what we stand for, and how we behave.

# Cultures and values

Our purpose and values are the foundation of our success. Our purpose is to build trust in society and solve important problems, and our values help us deliver on that purpose. Our purpose reflects 'why' we do what we do, and our strategy provides us with the 'what' we do. 'How' we deliver our purpose and strategy is driven by our culture, values and behaviours. This forms the foundation of our system of quality management and permeates how we operate, including guiding our leadership actions, and how we build trust in how we do business, with each other and in our communities.

When working with our clients and our colleagues to build trust in society and solve important problems, we:

- Act with integrity
- Make a difference
- Care
- Work together
- Reimagine the possible

Key messages are communicated to our firm by our Senior Partner and our leadership team and are reinforced by engagement partners. These communications focus on what we do well and actions we can take to make enhancements. We track whether our people believe that our leaders' messaging conveys the importance of quality to the success of our firm. Based on this tracking, we are confident our people understand our audit quality objectives.

Delivering service of the highest quality is core to our purpose and our assurance strategy, the focus of which is to strengthen trust and transparency in our clients, in the capital markets and wider society.

As mentioned previously, to help PwC Cyprus put this strategy into effect, the PwC network has established the QMSE framework which introduces an overall quality objective for the Assurance practice that is supported by a series of underlying quality management objectives. Our system of quality management (SoQM) must be designed and operated so that these objectives are achieved with reasonable assurance. The achievement of these objectives is supported by a quality management process established by our firm and Assurance leadership, business process owners, and partners and staff.

## Quality Measures

- Global People Survey: People Engagement Index
- Global People Survey: Quality Behaviour Index scores

### ≡ Leadership responsibilities for quality within the firm

The overall responsibility for the firm's SoQM lies with the firm's Management Board. The day-to-day responsibility for the implementation of this system and for monitoring risks and the effectiveness of controls is delegated to the Heads of the Lines of Service and Functions as appropriate. The firm's leadership is committed in delivering high-quality service and upholding the values of integrity, independence, professional ethics and professional competence which are embedded within the audit process. The firm's leadership has appointed a number of Partners and Directors in roles dedicated to establishing high standards of quality. The following, who are supported by appropriate additional resources, deal with the management of relevant functions within Assurance:

**+ Petros Petrakis**

Chief Risk Officer, Ethics & Business Conduct Leader, Partner Responsible for Independence

**+ George Kazamias**

Assurance Risk & Quality Partner, Audit Methodology Partner, Regulatory Affairs Partner, Information Security and Data Protection Partner

**+ Demetris Psaltis**

Money Laundering Compliance Officer

**+ Eliana Iacovides Kourris**

Office of General Counsel

**+ Anna Loizou**

Chief People Officer, Accounting Consulting Services Partner

**+ Ioannis Efthymiou**

Assurance Learning & Education

Audit Engagement Leaders take primary responsibility for the delivery of the firm's audit opinion. Audit quality is a major component of the Partner planning, assessment and execution process.

## The Quality Management Process

This quality management process includes:

- identifying risks to achieving the quality objectives
- designing and implementing responses to the assessed quality risks
- monitoring the design and operating effectiveness of the policies and procedures through the use of process-integrated monitoring activities such as real-time assurance as well as appropriate Assurance quality indicators
- continuously improving the system of quality management when areas for improvement are identified by performing root cause analyses and implementing remedial actions and
- establishing a quality-related recognition and accountability framework to be used in appraisals, remuneration, and career progression decisions

This involves the integrated use of Assurance Quality Indicators to aim to predict quality issues, Real Time Assurance to aim to prevent quality issues, Root Cause Analysis to learn from quality issues and a Recognition and Accountability Framework to reinforce quality behaviours, culture and actions.

These programs, by design, require ongoing monitoring and continuous improvement, in particular Assurance Quality Indicators, which we expect will evolve significantly over time and as we continue to use and learn from these measures.

### ≡ Aim to Predict: Assurance Quality Indicators

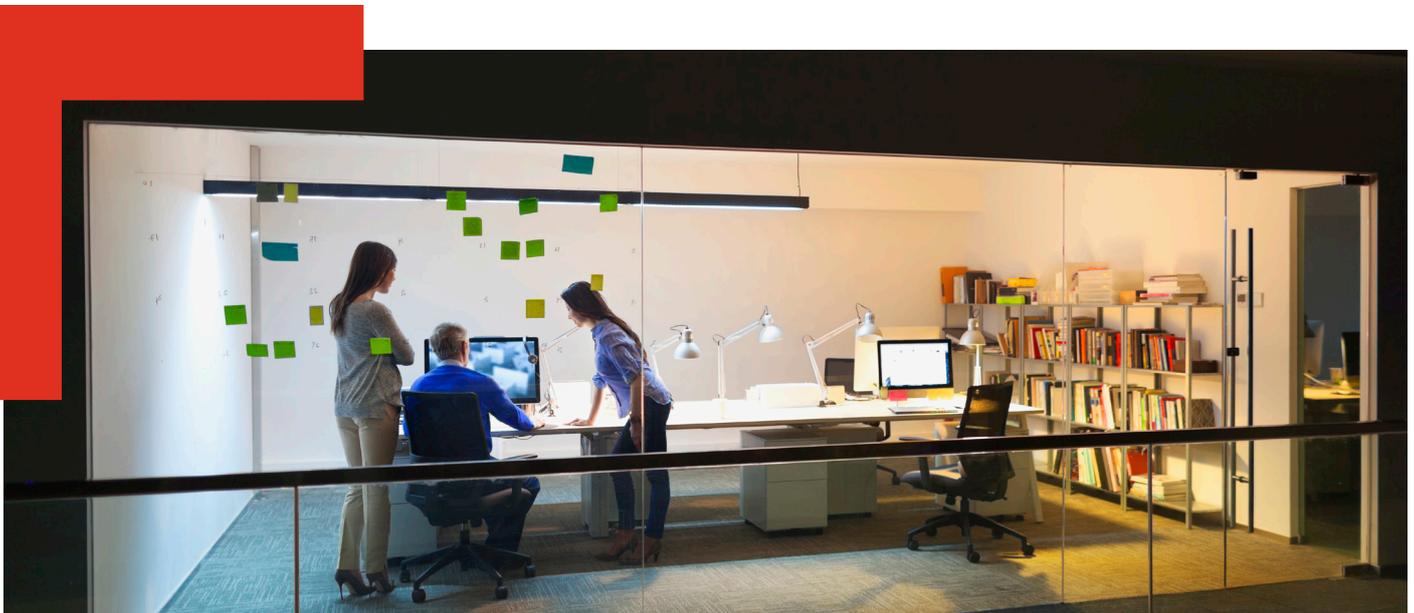

We have identified a set of Assurance Quality Indicators (AQIs) that support our Assurance leadership team in the early identification of potential risks to quality, using metrics to aim to predict quality issues. This quality risk analysis is an essential part of our QMSE, and the AQIs, in addition to other performance measures, also provide a key tool in the ongoing monitoring and continuous improvement of our SoQM.

### ≡ Aim to Prevent: Real Time Assurance

We have developed a Real Time Quality Assurance (RTA) program designed to provide preventative monitoring that helps coach and support engagement teams get the 'right work' completed in real-time, during the audit.

Our RTA programme is made up of two components:

- Real-time reviews, which are performed by experienced staff members, and are focused on identifying and resolving potential quality matters prior to the issuance of an audit report; and
- Real-time coaching, which uses data points from the firm's active audit engagements to identify potential quality matters and communicate them to engagement teams for consideration and resolution.

### Learn: Root cause analysis

We perform analyses to identify potential factors contributing to our firm's audit quality so that we can take actions to continuously improve. Our primary objectives when conducting such analyses are to understand what our findings tell us about our SoQM and to identify how our firm can provide the best possible environment for our engagement teams to deliver a quality audit. We look at quality findings from all sources including our own ongoing monitoring of our SoQM as well as Network inspection of our SoQM. We look at quality findings from all sources including our own ongoing monitoring of our SoQM as well as Network inspection of our SoQM, audits both with and without deficiencies-whether identified through our own internal inspections process or through external inspections and other inputs such as our Global People Survey and financial statement restatements and accounting errors-to help identify possible distinctions and learning opportunities.

For individual audits, an objective team of reviewers identifies potential factors contributing to the overall quality of the audit. We consider factors relevant to technical knowledge, supervision and review, professional scepticism, engagement resources, and training, amongst others. Potential causal factors are identified by evaluating engagement information, performing interviews, and reviewing selected audit working papers to understand the factors that may have contributed to audit quality.

In addition, the data compiled for audits both with and without deficiencies is compared and contrasted to identify whether certain factors appear to correlate to audit quality. Examples of this data include the hours incurred on the audit, whether key engagement team members are in the same geography as the client, the number of years that key engagement team members have been on the engagement, the number of other audits that engagement partners are involved in, whether the engagement was subject to a pre-issuance review, and the timing of when the audit work was performed.

Our goal is to understand how quality audits may differ from those with deficiencies, and to use these learnings to continuously improve all of our audits. We evaluate the results of these analyses to identify enhancements that may be useful to implement across the practice. We believe these analyses contribute significantly to the continuing effectiveness of our quality controls.

### Reinforce: Recognition and Accountability Framework

Our Recognition and Accountability Framework (RAF) reinforces quality in everything our people do in delivering on our strategy, with a focus on the provision of services to our clients, how we work with our people and driving a high quality culture. It holds partners, including non-partner Engagement Leaders accountable for quality behaviours and quality outcomes beyond compliance. Our RAF considers and addresses the following key elements:

- **Quality outcomes:** We provide transparent quality outcomes to measure the achievement of the quality objectives. Our quality outcomes take into account meeting professional standards and the PwC network and our firm's standards and policies;
- **Behaviours:** We have set expectations of the right behaviours that support the right attitude to quality, the right tone from the top and a strong engagement with the quality objective;
- **Interventions/recognition:** We have put in place interventions and recognition that promote and reinforce positive behaviours and drive a culture of quality; and
- **Consequences/reward:** We have implemented financial and non-financial consequences and rewards that are commensurate to outcome and behaviour and sufficient to incentivise the right behaviours to achieve the quality objectives.

## Ethics, independence and objectivity

### ≡ Ethics

At PwC, we adhere to the fundamental principles of ethics set out in the International Ethics Standards Board for Accountants (IESBA) Code of Ethics for Professional Accountants (the Code), which are:

- i. Integrity - to be straightforward and honest in all professional and business relationships.
- ii. Objectivity - to not allow bias, conflict of interest or undue influence of others to override professional or business judgements.
- iii. Professional Competence and Due Care - to maintain professional knowledge and skill at the level required to ensure that a client or employer receives competent professional service based on current developments in practice, legislation and techniques and act diligently and in accordance with applicable technical and professional standards.
- iv. Confidentiality - to respect the confidentiality of information acquired as a result of professional and business relationships and, therefore, not disclose any such information to third parties without proper and specific authority, unless there is a legal or professional right or duty to disclose, nor use the information for the personal advantage of the professional accountant or third parties.
- v. Professional Behaviour - to comply with relevant laws and regulations and avoid any action that discredits the profession.

Our network standards applicable to all network firms cover a variety of areas including ethics and business conduct, independence, anti-money laundering, anti-trust/fair-competition, anti-corruption, information protection, firm's and partner's taxes, sanctions laws, internal audit and insider trading. We take compliance with these ethical requirements seriously and strive to embrace the spirit and not just the letter of those requirements. All partners and staff undertake annual mandatory training, as well as submitting annual compliance confirmations, as part of the system to support appropriate understanding of the ethical requirements under which we operate. Partners and staff uphold and comply with

the standards developed by the PwC network and leadership in PwC Cyprus monitors compliance with these obligations.

In addition to the PwC Values (Act with Integrity, Make a difference, Care, Work together, Reimagine the possible) and PwC Purpose, PwC Cyprus has adopted the PwC network standards which include a Code of Conduct, and related policies that clearly describe the behaviours expected of our partners and other professionals-behaviours that will enable us to build public trust. Because of the wide variety of situations that our professionals may face, our standards provide guidance under a broad range of circumstances, but all with a common goal-to do the right thing.

Upon hiring or admittance, all staff and partners of PwC Cyprus are provided with the PwC Global Code of Conduct. They are expected to live by the values expressed in the Code in the course of their professional careers at our firm and have a responsibility to report and express concerns, and to do so fairly, honestly, and professionally when dealing with a difficult situation or when observing conduct inconsistent with the Code. Each firm in the PwC network provides a mechanism to report issues. There is also a confidential global reporting option on [pwc.com/codeofconduct](https://www.pwc.com/codeofconduct). PwC Cyprus has adopted an accountability framework to facilitate remediation of behaviours that are inconsistent with the Code of Conduct.

The PwC Code of Conduct is available on-line for all internal and external stakeholders at <https://www.pwc.com/ethics>.

Finally, the Organisation for Economic Co-operation and Development (OECD) provides guidance, including the OECD Guidelines for Multinational Enterprises (the OECD Guidelines), by way of non-binding principles and standards for responsible business conduct when operating globally. The OECD Guidelines provide a valuable framework for setting applicable compliance requirements and standards. Although the PwC network consists of firms that are separate legal entities which do not form a multinational corporation or enterprise, PwC's network standards and policies are informed by and meet the goals and objectives of the OECD Guidelines.

## Objectivity and Independence

As auditors of financial statements and providers of other types of professional services, PwC member firms and their partners and staff are expected to comply with the fundamental principles of objectivity, integrity and professional behaviour. In relation to assurance clients, independence underpins these requirements. Compliance with these principles is fundamental to serving the capital markets and our clients.

The PwC Global Independence Policy, which is based on the Code, including International Independence Standards, contains minimum standards with which PwC member firms have agreed to comply, including processes that are to be followed to maintain independence from clients, when necessary.

PwC Cyprus has a designated partner (known as the 'Partner Responsible for Independence' or 'PRI') with appropriate seniority and standing, who is responsible for implementation of the PwC Global Independence Policy including managing the related independence processes and providing support to the business. The partner is supported by a team of independence specialists. The PRI, who is also the Chief Risk Officer and a member of the firm's management board, reports directly to the Senior Partner.

## Independence policies and practices

The PwC Global Independence Policy covers, among others, the following areas:

- personal and firm independence, including policies and guidance on the holding of financial interests and other financial arrangements, e.g., bank accounts and loans by partners, staff, the firm and its pension schemes;
- non-audit services and fee arrangements. The policy is supported by Statements of Permitted Services (SOPS), which provide practical guidance on the application of the policy in respect of non-audit services to audit clients and related entities;
- business relationships, including policies and guidance on joint business relationships (such as joint ventures and joint marketing) and on purchasing of goods and services acquired in the normal course of business; and
- acceptance of new audit and assurance clients, and the subsequent acceptance of any non-assurance services to be provided to those clients.

In addition, there is a Network Risk Management Policy governing the independence requirements related to the rotation of key audit partners.

These policies and processes are designed to help PwC comply with relevant professional and regulatory standards of independence that apply to the provision of assurance services. Policies and supporting guidance are reviewed and revised when changes arise such as updates to laws and regulations, including any changes to the Code or in response to operational matters.

PwC Cyprus supplements the PwC network Independence Policy as required by local laws including the independence requirements of the EU Audit Regulation where they are more restrictive than the network's policy.

## Independence-related systems and tools

As a member of the PwC network, PwC Cyprus has access to a number of systems and tools which support PwC member firms and their personnel in executing and complying with our independence policies and procedures. These include:

- The Central Entity Service (CES), which contains information about corporate entities including all PwC audit clients and their related entities (including all public interest audit clients and SEC restricted entities) as well as their related securities. CES assists in determining the independence restriction status of clients of the member firm and those of other PwC member firms before entering into a new non-audit service or business relationship. This system also feeds Independence Checkpoint and Authorisation for Services;
- 'Independence Checkpoint' which facilitates the pre-clearance of publicly traded securities by all partners and practice managers before acquisition and is used to record their subsequent purchases and disposals. Where a PwC member firm wins a new audit client, this system automatically informs those holding securities in that client of the requirement to sell the security where required;
- Authorisation for Services (AFS) which is a global system that facilitates communication between a non-audit services engagement leader and the audit engagement leader, regarding a proposed non-audit service, documenting the analysis of any potential independence threats created by the service and proposed safeguards, where deemed necessary, and acts as a record of the audit partner's conclusion on the permissibility of the service; and
- Global Breaches Reporting System which is designed to be used to report any breaches of external auditor independence regulations (e.g., those set by regulation or professional requirements) where the breach has cross-border implications (e.g., where a breach occurs in one territory which affects an audit relationship in another territory). All breaches reported are evaluated and addressed in line with the Code.

PwC Cyprus also has a number of Cyprus-specific systems which include:

- A rotation tracking system which monitors compliance with PwC Cyprus' audit rotation policies for the member firm, the engagement leaders, other key audit partners and senior staff involved in an audit; and
- A database that records all approved close business relationships entered into by PwC Cyprus. These relationships are reviewed on a six-monthly basis to ensure their ongoing permissibility.

### ≡ Independence training and confirmations

PwC Cyprus provides all partners and practise staff with annual or on-going training on independence matters. Training typically focuses on changes in policy or external regulation and, as relevant, provision of services. Partners and staff receive computer-based training on PwC Cyprus' independence policy and related topics. Additionally, face-to-face training is delivered to partners and practise staff on an annual basis by PwC Cyprus' independence specialists and risk and quality teams.

All partners and practice staff are required to complete an annual compliance confirmation, whereby they confirm their compliance with relevant aspects of the member firm's independence policy, including their own personal independence. In addition, all partners confirm that all non-audit services and business relationships for which they are responsible comply with policy and that the required processes have been followed in accepting these engagements and relationships. These annual confirmations are supplemented by periodic and ad-hoc engagement level confirmations for audit clients.

### ≡ Independence monitoring and disciplinary policy

PwC Cyprus is responsible for monitoring the effectiveness of its quality control system in managing compliance with independence requirements. In addition to the confirmations described above, as part of this monitoring, we perform:

- Compliance testing of independence controls and processes;
- Personal independence compliance testing of a random selection of, at a minimum, partners and practice managers as a means of monitoring compliance with independence policies; and
- An annual assessment of the member firm's adherence with the PwC network's standard relating to independence.

The results of PwC Cyprus' monitoring and testing are reported to the firm's management on a regular basis.

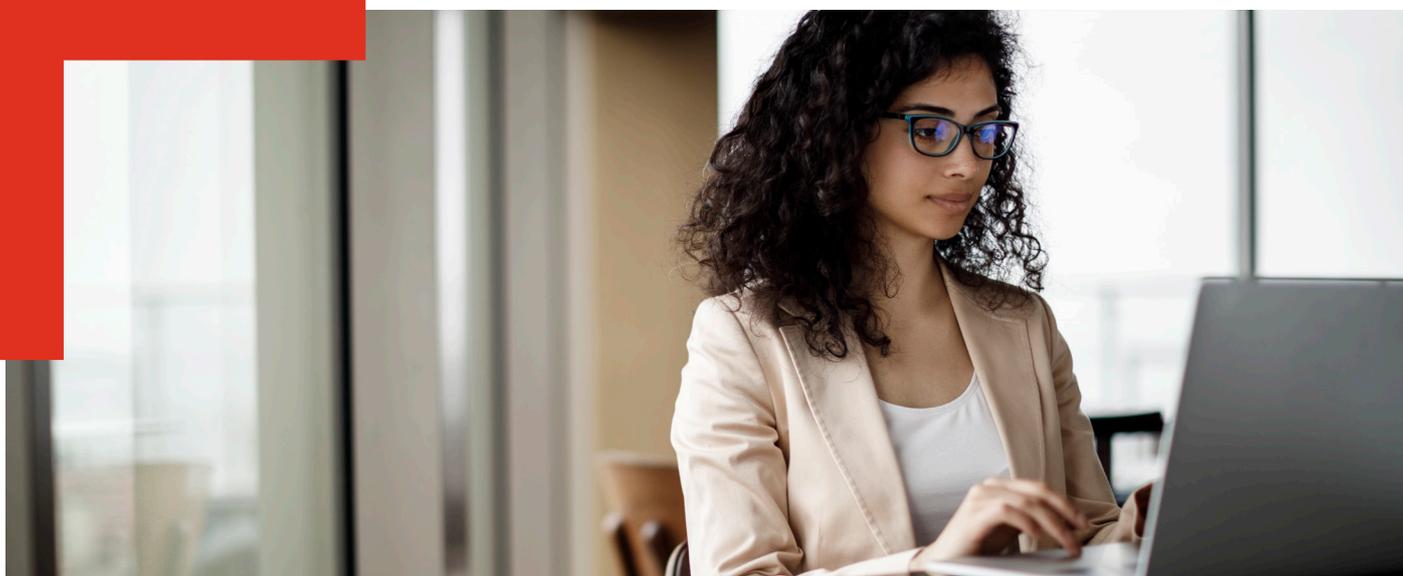

PwC Cyprus has disciplinary policies and mechanisms in place that promote compliance with independence policies and processes, and that require any breaches of independence requirements to be reported and addressed.

This would include discussion with the client's audit committee regarding the nature of a breach, an evaluation of the impact of the breach on the independence of the member firm and the engagement team and the need for actions or safeguards to maintain objectivity. Although most breaches are minor and attributable to an oversight, all breaches are taken seriously and investigated as appropriate. The member firm also follows supplemental local requirements relating to the reporting of breaches. The investigations of any identified breaches of independence policies also serve to identify the need for improvements in PwC Cyprus' systems and processes and for additional guidance and training.

### ≡ Key Audit Partner, Quality Review Partner and senior staff members rotation policy

In relation to Public Interest Entities (PIE), as defined in the Cyprus Auditors' Law of 2017, as amended (Auditors' Law), we adhere to the Key Audit Partner (KAP) and senior staff member rotation requirements of Regulation (EU) No 537/2014 (EU Audit Regulation) and the IESBA Code of Ethics. As defined by the Auditors' Law, KAP includes the statutory auditor designated by the firm as being primarily responsible for carrying out the statutory audit of an EU PIE, including at the level of the group, the statutory auditor who signs the audit report and, in the case of a group audit, the statutory auditor designated at the level of material subsidiaries. Under the Independence rules published by IESBA Code of Ethics, the definition of KAP also includes the Quality Review Partner.

In respect of an audit of an EU PIE, the KAP tenure is set to a maximum of seven years and to a maximum of ten years for managers of such audits, followed by a three-year cooling-off period for both.

## Considerations in undertaking the audit

Our principles for determining whether to accept a new client or continue serving an existing client are fundamental to delivering quality, which we believe goes hand-in-hand with our purpose to build trust in society. We have established policies and procedures for the acceptance of client relationships and audit engagements that consider whether we are competent to perform the engagement and have the necessary capabilities including time and resources, can comply with relevant ethical requirements, including independence, and have appropriately considered the integrity of the client. We reassess these considerations in determining whether we should continue with the client engagement and have in place policies and procedures related to withdrawing from an engagement or a client relationship when necessary.

### ≡ Client and Engagement Acceptance and Continuance

Our firm focuses on the quality of prospective clients and has established consistent policies and rigorous vetting procedures for accepting clients across all of our Lines of Service that are in line with the Prevention and Suppression of Money Laundering and Terrorist Financing Law of 2007 of Cyprus, as amended. In assessing acceptance of a prospective client, the following are taken into consideration:

- the identity, business reputation, integrity and ethics of the client's principal owners, key management and those charged with its governance;
- information concerning the attitude of the client's principal owners, key management and those charged with its governance towards matters that might affect the provision of a prospective service (for example, aggressive interpretation of accounting standards and the internal control environment in the context of assurance engagements);
- the nature of the client's operations, including its business practices;
- imposed limitations in the scope of work which may raise questions about the integrity of the client;
- indications that the client might be involved in money laundering or other criminal actions;
- the public profile of the prospective client and the underlying reasons for that profile;
- a sense of the operating and control environments of entities involved;
- financial condition and the prospective client's ability to pay our fees;
- whether heightened risks of fraud exist (for example, opportunities, incentives, or pressures); and
- independence and potential conflicts of interest and any current or previous relationships with other PwC firms.

PwC Cyprus has a process in place to identify acceptable clients based on the PwC network's proprietary decision support systems for audit client acceptance and retention (called Acceptance and Continuance ('A&C')). A&C facilitates a determination by the engagement team, business management and risk management specialists of whether the risks related to an existing client or a potential client are manageable, and whether or not PwC should be associated with the particular client and its management.

More specifically, this system enables:

### ≡ Engagement teams:

- To document their consideration of matters required by professional standards related to acceptance and continuance;
- To identify and document issues or risk factors and their resolution, for example through consultation by adjusting the resource plan or audit approach or putting in place other safeguards to mitigate identified risks or by declining to perform the engagement; and
- To facilitate the evaluation of the risks associated with accepting or continuing with a client and engagement.

### ≡ Member firms (including member firm leadership and risk management):

- To facilitate the evaluation of the risks associated with accepting or continuing with clients and engagements;
- To provide an overview of the risks associated with accepting or continuing with clients and engagements across the client portfolio; and
- To understand the methodology, basis and minimum considerations all other member firms in the network have applied in assessing audit acceptance and continuance.

04

Our People

# Our People

## ≡ People strategy

We are focused on being the world's leading developer of talent and enabling our people with greater agility and confidence in a rapidly changing world. Specific focus areas include creating a resilient foundation for times of change through supporting the well-being of our people and enabling effective delivery; developing inclusive leaders for a shifting world; and enabling our workforce for today's realities and tomorrow's possibilities.

FY22 was a pivotal year for our people and our People Strategy. It was a year to look ahead and plan for the post-pandemic life, focusing on enhancing not only our already existing flexibility practices but also the full set of experiences we are offering to our people on a day to day basis.

For this reason, we introduced a revamped People Value Proposition (PVP) that represents a deal between the organisation and our people. Our PVP is designed to bring

to life what it means and feels like to work at PwC. It clearly sets out what our people can expect from the organisation and what is expected from them, supporting them to be the best they can be, both professionally and personally.

We have gone for a holistic approach with an emphasis on making the job experience and learning richer, more interesting, more challenging and fulfilling. As we build an environment where all our people truly feel empowered to manage their time and commitments, both professional and personal, it's crucial that we foster trust, inclusivity and fairness as the key building blocks to shaping the ever changing world of work.

Our PVP also shines a spotlight on empowered flexibility - giving our people more control over where, when and how they work, as we all adapt to a new, hybrid way of working from home, client sites and our offices.

### Audit Quality Measures

- Average staff retention rate

## Diversity and Inclusion

At PwC, we're committed to creating a culture of belonging. We are focused on ensuring our ways of working embrace diversity and fostering an inclusive environment in which our people are comfortable bringing their whole selves to work and feel that they belong and can reach their full potential. As demonstrated through our core values of Care and Work Together, we strive to more deeply understand and empathise with different backgrounds, perspectives and experiences. We know that when people from different backgrounds and with different points of view work together, we create the most value for our clients, our people, and society.

## Recruitment

PwC Cyprus aims to recruit, train, develop and retain the best and the brightest staff who share in the firm's strong sense of responsibility for delivering high-quality services. Our hiring standards include a structured interview process with behaviour-based questions built from The PwC Professional framework, assessment of academic records, and background checks.

We are continuing to take a long-term view when it comes to investing in attracting new talent and have continued our recruitment for our Professional Training Schemes and Summer Internship Programme. This year we also had our first round of high calibre actuarial trainees, ready to achieve the premier actuarial qualification.

As the world and the environment in which we are operating are rapidly changing, we need to be agile, adaptable and be ready to do things differently too. In this context, we believe that we should give more opportunities and alternative paths to our youth to progress their careers. We have thus launched a new scheme addressed to high school leavers and university graduates who would like to pursue a career in accounting. Through this new scheme, high school leavers and university graduates will have the opportunity to achieve the accounting qualification LCCI, fully sponsored by the Firm.

In FY22, we received more than 900 applications for employment and recruited 239 professionals across the organisation including 145 new university graduates. Remaining steadfast in our commitment to attract talented people we have held virtual presentations in more than 20 Universities across the UK and a presentation in the University of Cyprus attracting an audience of more than 400 calibre graduates.

Moreover, through our Summer Internship Programme we received more than 200 applications and have given the opportunity to 70 high calibre university students from a diverse background to work with our professional teams as well as secure a position in one of our Professional Training Schemes.

## Team selection, experience and supervision

Our audit engagements are staffed based on expertise, capabilities and years of experience. Engagement leaders determine the extent of direction, supervision and review of junior staff.

## Feedback and continuous development

Our team members obtain feedback on their overall performance, including factors related to audit quality, such as technical knowledge, auditing skills and professional scepticism. Audit quality is an important factor in performance evaluation and career progression decisions for both our partners and staff. Feedback on performance and progression is collected via our Snapshot tool, a simple, mobile-enabled technology. We also use Workday to give and receive upward and peer feedback. Ongoing feedback conversations help our people grow and learn faster, adapt to new and complex environments, and bring the best to our clients and firm.

## Career progression

PwC Cyprus uses The PwC Professional, our global career progression framework, which sets out clear expectations at all staff levels across five key dimensions. The framework underpins all elements of career development and helps our people develop into well-rounded professionals and leaders with the capabilities and confidence to produce high-quality work, deliver an efficient and effective experience for our clients, execute our strategy, and support our brand. Our annual performance cycle is supported by continuous feedback conversations and regular check-ins with the individual's Team Leader to discuss their development, progression and performance.

## Global People Survey

Each PwC member firm participates in an annual Global People Survey, administered across the network to all of our partners and staff. PwC Cyprus is responsible for analysing and communicating results locally, along with clearly defined actions to address feedback.

## Retention

Turnover in the public accounting profession is often high because as accounting standards and regulations change, accountants are in demand and the development experience we provide makes our staff highly sought after in the external market. Our voluntary turnover rate fluctuates based on many factors, including the overall market demand for talent.

To reinforce our people's engagement, which remained as one of our strategic priorities for FY22, we took a variety of key actions aiming to an even more empowering and supportive workplace.

We adopted a pilot 4-day week in July and August 2022, with our offices being closed on Fridays. We expect that this innovative move allows us to remain focused on improving employee wellbeing and experience, and that it will boost the flexible and hybrid work models we already have in place, allowing each and every one of us to achieve a healthier work-life balance.

At the same time, we continued to provide our wellbeing services, including a 24/7 Employee Assistance Programme for psychological support, nutritionist, physiotherapist and parental advisor.

Finally, in recognition of our people's contribution and hard work, we gave an average of 6% salary increase to our people in July 2022. Additionally, we paid a Performance Bonus in December 2021 and July 2022, on the basis of the organisation's performance and People's individual performance to our Senior Associates 2, Managers, Senior Managers and Directors.

## The PwC Professional

The PwC Professional supports the development and career progression of our staff by providing a single set of expectations across all lines of service, geographies, and roles; outlining the capabilities needed to thrive as purpose-led and values-driven leaders at every level.

## Audit Quality Measures

- Average training hours achieved by partners and staff
- Average training hours on digital upskilling courses

## Professional Development

We are committed to putting the right people in the right place at the right time. Throughout our people's careers, they are presented with career development opportunities, classroom, virtual classroom and on-demand learning, and on-the-job real time coaching/development. Our flexible training portfolio facilitates personalised learning with access to a variety of educational materials, including eLearning, podcasts, articles, videos, and courses.

Achieving a professional credential supports our Firm's commitment to quality through consistent examination and certification standards. Our goal is to provide our staff with a more individualised path to promotion and support them in prioritising and managing their time more effectively when preparing professional exams. Providing our people with the ability to meet their professional and personal commitments is a critical component of our people experience and retention strategy.

## Continuing education

We, and other PwC member firms, are committed to delivering quality assurance services around the world. To maximise consistency in the Network, the formal curriculum, developed at the Network level, provides access to training materials covering the PwC audit approach and tools-this includes updates on auditing standards and their implications, as well as areas of audit risk and areas of focus for quality improvement.

This formal learning is delivered using a blend of delivery approaches, which include remote access, classroom learning, virtual classroom, and on-the-job support. The curriculum supports our primary training objective of audit quality, while providing practitioners with the opportunity to strengthen their technical and professional skills, including professional judgement while applying a sceptical mindset. The design of the curriculum allows us to select, based on local needs, when we will deliver the training. Our Learning & Education Leader then considers what additional training is appropriate - formal and/or informal - to address any additional specific local needs.

The curriculum is designed to cover areas such as our audit approach, auditing standards, areas of audit risk and others, ensuring staff are up-to-date and adhere to our quality standards. Examples of technical training programs include the IFRS Update Course, the Risk & Quality Update Course and the Audit Quality Program.

Our flexible curriculum also aims to help our people reach their full potential, by providing opportunities for them to continuously develop their leadership and people management skills and grow their careers. Non-technical training covers topics such as prioritisation and delegation skills, emotional intelligence, performance and on-the-job coaching, communicating difficult messages, inclusion, wellbeing, building trust and enhancing relationship skills.

05

Our approach

# Our approach

**PwC Cyprus uses a range of cutting-edge methods, processes, technologies, and approaches to ensure continuous improvement in the performance and quality of our audit engagements.**

## ≡ Our approach

The quality and effectiveness of audit is critical to all of our stakeholders. We therefore invest heavily in the effectiveness of our audits, in the skills of our people, in our underlying methodology, the technology we use, and in making the right amount of time and resources available. We pay close attention to the internal indicators and processes that routinely monitor the effectiveness of our risk and quality processes, and provide timely information about the quality of our audit work and any areas for improvement. Details of these indicators and processes can be found in the Monitoring of Assurance quality section. Additionally, we consider what our various stakeholders require from us, what they tell us we need to improve and the findings of regulatory inspections on the quality of our work.

## ≡ Our tools

As a member of the PwC network, PwC Cyprus has access to and uses PwC Audit, a common audit methodology and process. This methodology is based on the International Standards on Auditing (ISAs), with additional PwC policy and guidance provided where appropriate. PwC Audit policies and procedures are designed to facilitate audits conducted in compliance with all ISA requirements that are relevant to each individual audit engagement. Our common audit methodology provides the framework to enable PwC member firms to consistently comply in all respects with applicable professional standards, regulations and legal requirements.

## Tools and technologies to support our audit

### Our technology

#### Aura

Our global audit documentation platform, is used across the PwC network. Aura helps drive how we build and execute our audit plans by supporting teams in applying our methodology effectively, by creating transparent linkage between risks, required procedures, controls and the work performed to address those risks, as well as providing comprehensive guidance and project management capabilities. Targeted audit plans specify risk levels, controls reliance and substantive testing. Real time dashboards show teams audit progress and the impact of scoping decisions more quickly.

#### Connect

Is our collaborative platform that allows clients to quickly and securely share audit documents and deliverables. Connect also eases the burden of tracking the status of deliverables and resolving issues by automatically flagging and tracking outstanding items and issues identified through the audit for more immediate attention and resolution. Clients are also able to see audit adjustments, control deficiencies, and statutory audit progress for all locations - in real time.

#### Connect Audit Manager

Streamlines, standardises and automates group and component teams coordination for multi-location and statutory/regulatory audits. It provides a single digital platform to see all outbound and inbound work and digitises the entire coordination process which facilitates greater transparency, compliance and quality for complex multi-location audits.

#### Halo

Our data auditing tools, test large volumes of data, analysing whole populations to improve risk assessment, analysis and testing. For example, Halo for Journals enables the identification of relevant journals based on defined criteria making it easier for engagement teams to explore and visualise the data to identify client journal entries to analyse and start the testing process.

#### Count

Which facilitates the end-to-end process for inventory counts, allows our engagement teams to create and manage count procedures, counters to record results directly onto their mobile device or tablet and engagement teams to export final results into Aura. As part of The New Equation investment, the PwC network will be rolling out a continuous stream of new capabilities through our existing platforms to increasingly simplify, standardise, centralise and automate our audit work.

### Reliability and auditability of audit technologies

Our firm has designed and implemented processes and controls to underpin the reliability of these audit technologies. This includes clarification of the roles and responsibilities of audit technology owners and users. In addition, we have guidance focused on the sufficiency of audit documentation included in the workpapers related to the use of these audit technologies, including consideration of the reliability of the solution, and the documentation needed to assist the reviewer in meeting their supervision and review responsibilities as part of the normal course of the audit.

## Confidentiality and information security

**Confidentiality and information security are key elements of our professional responsibilities. Misuse or loss of confidential client information or personal data may expose the firm to legal proceedings, and it may also adversely impact our reputation. We take the protection of confidential and personal data very seriously.**

**Our focus on our clients requires a holistic and collaborative approach to reducing security, privacy and confidentiality risks with significant investment in appropriate controls and monitoring to embed an effective three lines of defence model. This model has enabled us to strengthen our information security organisation, align to industry good practice and improve our internal control frameworks.**

### ≡ Data Privacy

The firm maintains a robust and consistent approach to the management of all personal data, with everyone in our organisation having a role to play in safeguarding personal data. We have continued to build on our extensive GDPR readiness programme, and are committed to embedding good data management practices across our business.

### ≡ Information Security

Information security is a high priority for the PwC network. Member firms are accountable to their people, clients, suppliers, and other stakeholders to protect information that is entrusted to them.

The PwC Information Security Policy (ISP) is aligned with ISO/IEC 27001, financial services industry standards, and other reputable frameworks (COBIT, NIST, etc.) as benchmarks for security effectiveness across the network of member firms. The PwC ISP directly supports the firm's strategic direction of cyber readiness to proactively safeguard its assets and client information. The PwC ISP is reviewed, at a minimum, on an annual basis.

PwC Cyprus is required to adhere to the ISP requirements and complete a quarterly, data-driven assessment to demonstrate compliance. The Member Firm is assessed against the required controls through analysis of available data. In coordination with Member Firm stakeholders, the data is reviewed for quality to ensure an accurate assessment of the Member Firm's security posture. Deviations that result from the ISP Compliance Programme assessment process are prioritised for remediation utilising a risk based approach and per timelines agreed with leadership.

PwC Cyprus has also obtained the ISO/IEC 27001 certification which objectively demonstrates to its clients, business associates and staff that the firm complies with the information security management system (ISMS) standard, and that all the necessary requirements to protect sensitive information against unauthorised access and processing are undertaken.

## Supporting engagement performance

### Evolving delivery model

We continue to evolve the way we deliver our services so our people give our clients an even better experience, further enhance the quality of what we do and create economic capacity to invest in the future.

### Direction, coaching and supervision

Engagement leaders and senior engagement team members are responsible and accountable for providing quality coaching throughout the audit and supervising the work completed by junior members of the team, coach the team and maintain audit quality. Engagement teams utilise Aura which has capabilities to effectively monitor the progress of the engagement to determine that all work has been completed and reviewed by appropriate individuals, including the engagement leader.

### Consultation culture

Consultation is key to ensuring audit quality. While we have formal protocols about mandatory consultation, in the pursuit of quality, we regularly consult more than the minimum requirement. For example, our engagement teams routinely speak with experts in areas such as taxation, valuation, and other specialities.

### Specialised consultation teams

Risk & Quality, Assurance Methodology and Accounting Consulting Services teams provide technical accounting, auditing, and financial reporting as well as risk management and independence consultations. These specialists play a vital role in keeping our policies and guidance in these areas current by tracking new developments in regulatory, independence, accounting and auditing and providing those updates to professional staff.

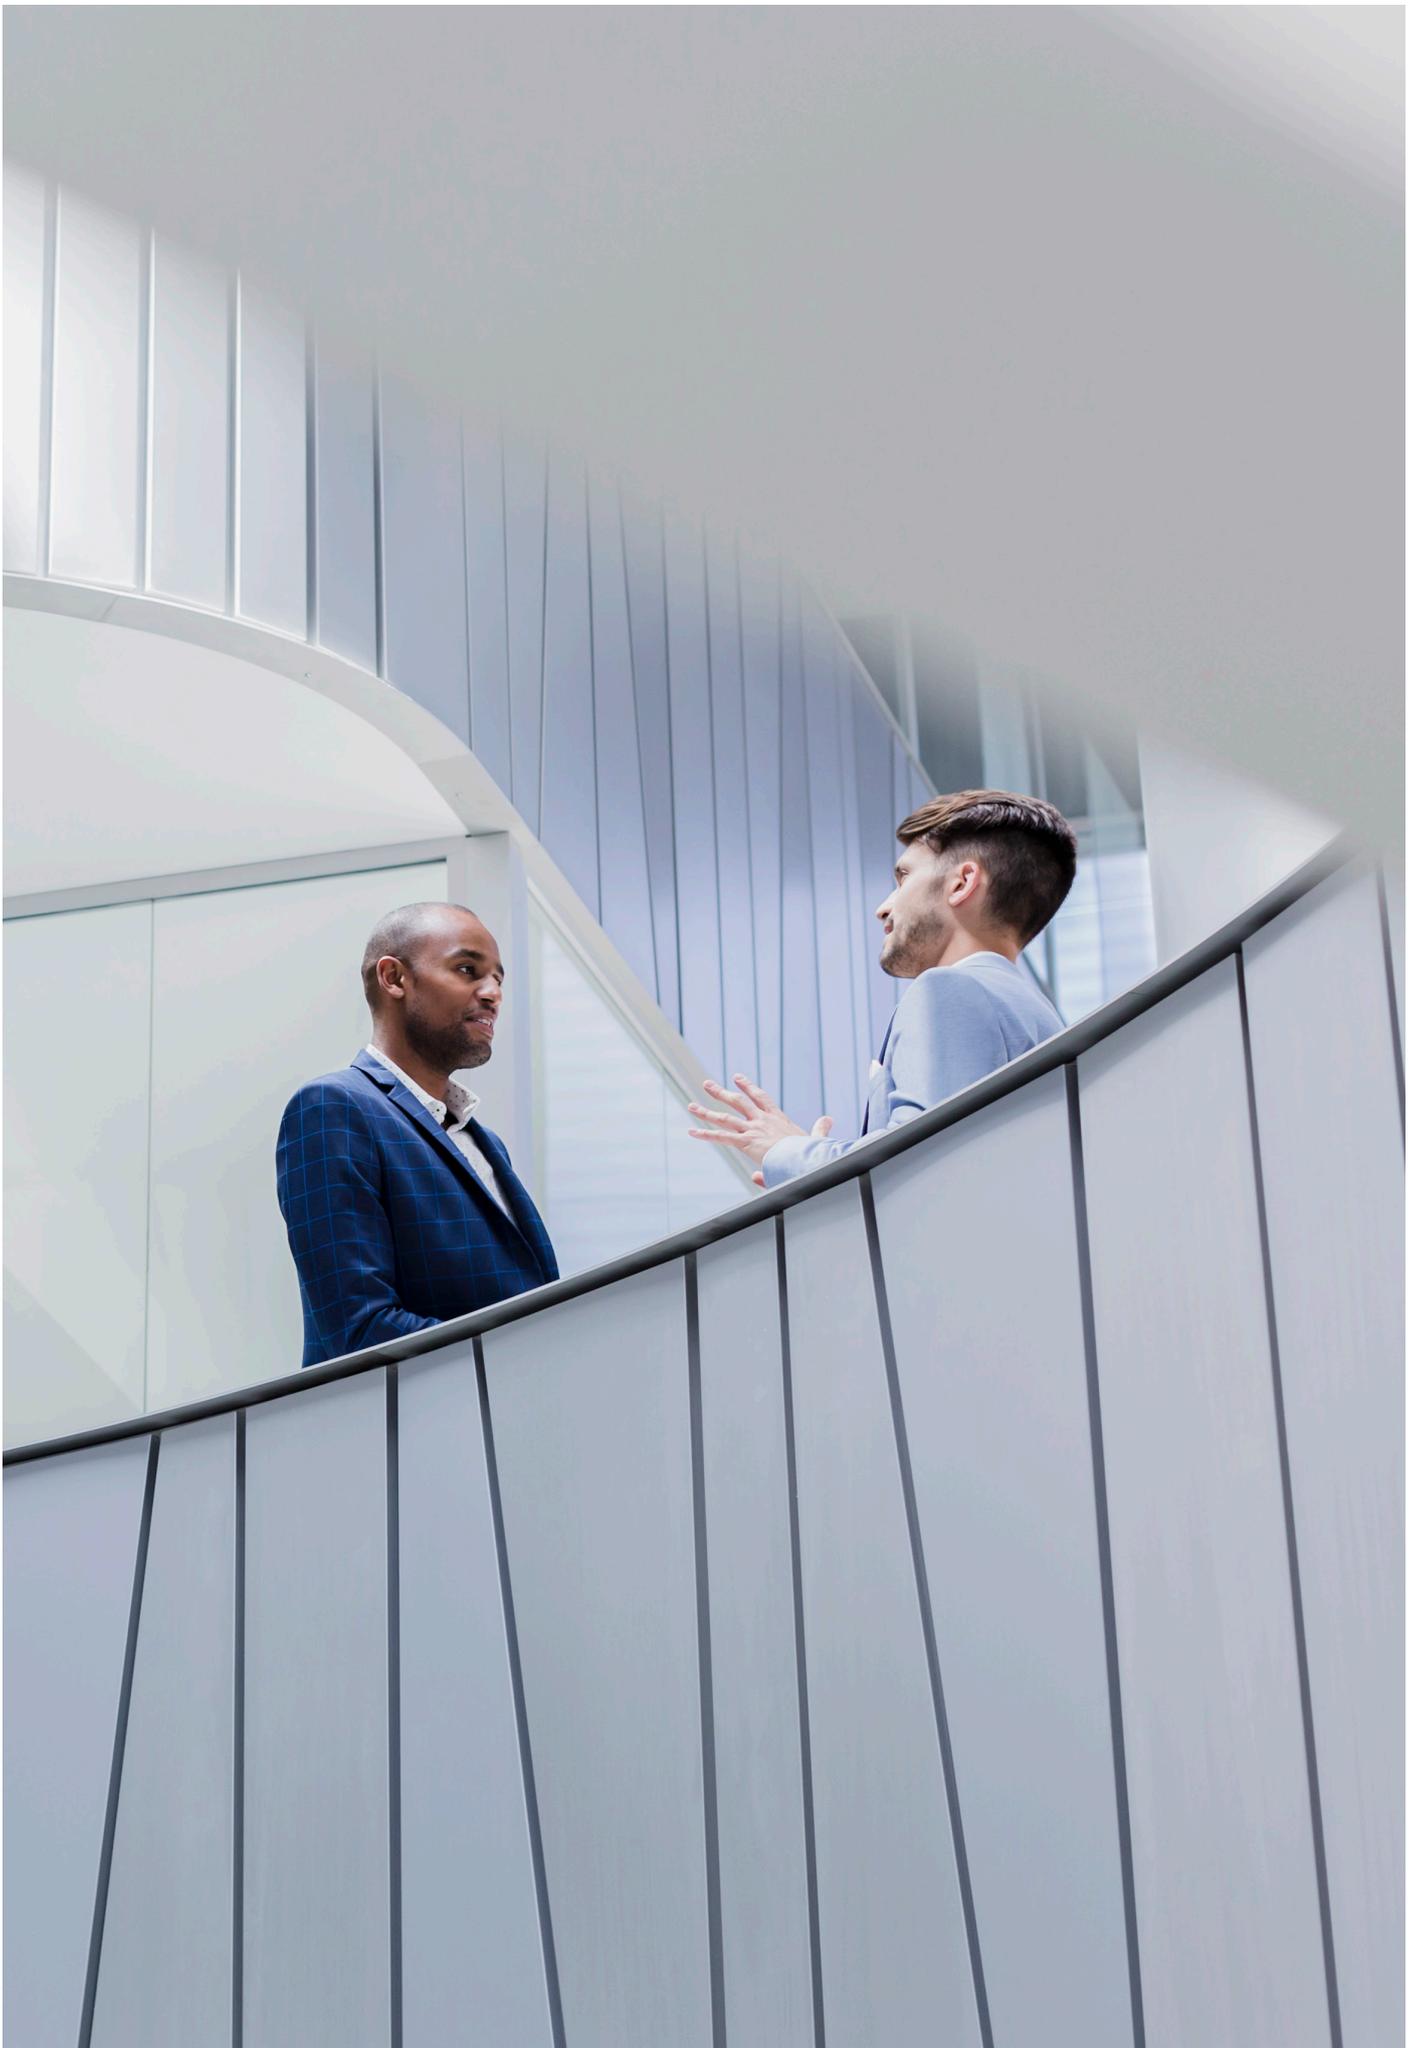

### Quality Review Partners (QRP)

Specific audit engagements are assigned a QRP as part of the member firm's system of quality management as required by professional standards. These partners, who have the necessary experience and technical knowledge, are involved in the most critical aspects of the audit. For example, they may advise on matters of firm independence, significant risks and a team's responses to those risks, and specific accounting, auditing, and financial reporting and disclosure issues.

### Differences of opinion

Protocols exist to resolve the situations where a difference of opinion arises between the engagement leader and either the QRP, another Assurance partner or central functions. These include the use of technical panels consisting of partners independent of the engagement.

06

Monitoring

# Monitoring

## ≡ Monitoring of Assurance quality

We recognise that quality in the Assurance services we deliver to clients is key to maintaining the confidence of investors and other stakeholders in the integrity of our work. It is a key element to our Assurance strategy.

Responsibility for appropriate quality management lies with the Leadership of PwC Cyprus. This includes the design and operation of an effective System of Quality Management (SoQM) that is responsive to our specific risks to delivering quality audit engagements, using the network's QMSE framework.

The overall quality objective under the QMSE framework is to have the necessary capabilities in our firm and to deploy our people to consistently use our methodologies, processes and technology in the delivery of Assurance services in an effective and efficient manner to fulfil the valid expectations of our clients and other stakeholders.

Our firm's monitoring procedures include an ongoing assessment aimed at evaluating whether the policies and procedures which constitute our SoQM are designed appropriately and operating effectively to provide reasonable assurance that our audit, non-audit assurance and related services engagements are performed in compliance with laws, regulations and professional standards. This includes the use of Real Time Assurance which is discussed in more detail on page 21 within The Quality Management Process section.

Our monitoring also encompasses a review of completed engagements (Engagement Compliance Reviews - ECR) as well as periodic monitoring of our SoQM by an objective team within our firm. The results of these procedures, together with our ongoing monitoring, form the basis for the continuous improvement of our SoQM.

Our firm's monitoring programme is based on a consistent network-wide inspections programme for Assurance based on professional standards relating to quality control, including ISQC 1, as well as network policies, procedures, tools and guidance.

### Audit Quality Measures

- Total number of ECRs
- Number of ECRs rated as compliant, compliant with improvements required, non-compliant ECRs related to total number of ECRs (%)

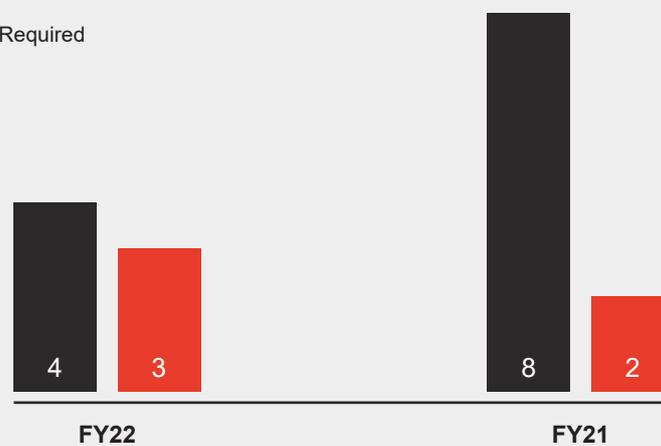

ECRs are risk-focused reviews of completed engagements covering, on a periodic basis, individuals in our firm who are authorised to sign audit, non-audit assurance or related services reports. The review assesses whether an engagement was performed in compliance with PwC Audit guidance, applicable professional standards and other applicable engagement-related policies and procedures. Each signer is reviewed at least once every five years, unless a more frequent review is required based on the profile of that signer's client engagements.

Reviews are led by experienced Assurance partners, supported by objective teams of partners, directors, senior managers and other specialists. ECR reviewers may be sourced from other member firms if needed to provide appropriate expertise or objectivity. Review teams receive training to support them in fulfilling their responsibilities, and utilise a range of checklists and tools developed at the network level when conducting their inspection procedures. The network inspection team supports review teams by monitoring the consistent application of guidance on classification of engagement findings and engagement assessments across the network.

### Audit quality reviews

#### Internal inspections

- Compliant
- Compliant with Improvements Required
- Non - Compliant

Additionally, the PwC network undertakes periodic reviews to evaluate certain elements of member firms' systems of quality management. We also look at the member firm leadership's own assessment of the effectiveness of their system of quality management and their determination of whether the overall quality objective has been achieved.

The results of all inspections are reported to our firm's leadership who are responsible for analysing the results of the inspections along with the findings identified from all sources of information and implementing remedial actions as necessary. In situations where adverse quality matters on engagements are identified, based on the nature and circumstances of the issues,

the responsible partner or our firm's Assurance leadership personnel may be subject to additional mentoring, training or further sanctions in accordance with our firm's Recognition and Accountability Framework.

Partners and employees of our firm are informed about the inspection results and the actions taken to enable them to draw the necessary conclusions for the performance of their engagements. In addition, engagement partners of our firm are informed by the network inspection program about relevant inspection findings in other PwC member firms, which enables our partners to consider these findings in planning and performing their audit work.

Our firm is also subject to inspections by the Cyprus Public Audit Oversight Board, which is the firm’s local regulator. These inspections entail:

- an periodical review of the firm’s internal quality control systems to assess the firm’s adherence to the requirements of the International Standard on Quality Control 1 ('ISQC1') and other legal and regulatory requirements, with the latest inspection of this type being completed in May 2022; and
- an annual review of selected engagements to assess whether they were performed in accordance with professional standards and applicable legal and regulatory requirements, and that the audit report issued thereon was appropriate in the circumstances, the latest inspection of this type being completed in July 2022, the results of which are available below.

On the basis of the results of this inspection, the firm continues to be registered to conduct statutory audit work in Cyprus.

Matters identified as part of the regulatory inspections, whether designated as significant or not, have been taken into consideration and formed part of an action plan, the implementation of which is monitored by the Assurance Leadership.

### Audit quality reviews

External inspections\*

☰ 1 - Good

☰ 2A - Limited improvements required

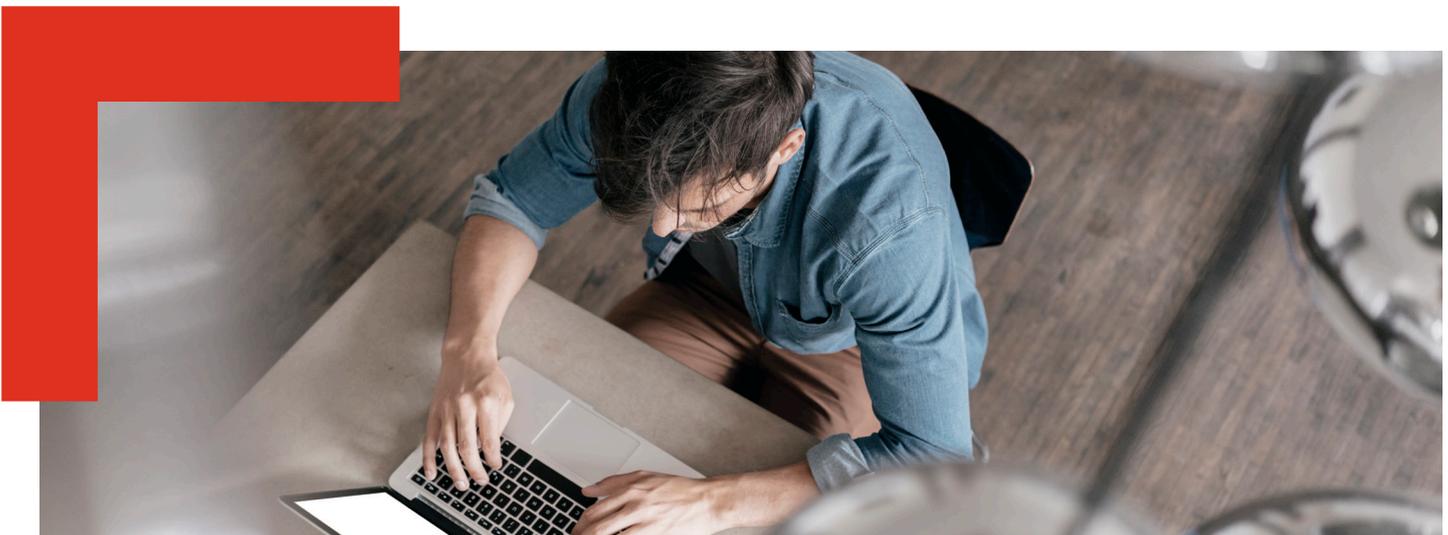

### ☰ Statement on the effectiveness of the firm’s internal quality control system

On the basis of internal monitoring, PwC network and local regulatory reviews performed, the Management Board is satisfied that the SoQM is operating effectively. Any matters identified through the various monitoring and review processes are actioned and changes implemented as appropriate.

### Audit Quality Measures

- Total number of file reviews by external regulators
- Number of file reviews by other external regulators resulting in non-compliance (or equivalent)

\*The possible assessments that may result from the reviews carried out by the regulator are: 1 - "Good", 2A - "Limited improvements required", 2B - "Improvements required", 3 - "Significant improvement required" and 4 - "Significant deficiencies identified".

07

### ≡ Size of the Network

Total turnover achieved by statutory auditors and audit firms from EEA Member States that are members of the PwC network resulting, to the best extent calculable, from the statutory audit of annual and consolidated financial statements is approximately

2.5 billion Euros. This represents the turnover from each entity's most recent financial year converted to Euros at the exchange rate prevailing as of 30 June 2022.

Yiangos Kaponides  
Zacharias Clerides

### Management Board

The Senior Partner who is elected by the firm's partners for a four year term, appoints the firm's Management Board. Each member of the Management Board is subject to formal, rigorous, and ongoing performance evaluation. The Management Board is responsible for assisting the Senior Partner in the formulation, implementation and communication of strategic priorities and oversight of the implementation of business plans, compliance with all PwC network obligations and the design, maintenance and operation of an effective quality control system. The Management Board meets at least once a month and the agenda of its meetings includes matters for consideration raised through the Senior Partner, by any Management Board member or PwC Cyprus Partner.

The Management Board takes responsibility for the establishment of a system of internal quality control and for reviewing and evaluating its effectiveness. The day-to-day responsibility for the implementation of this system, the ongoing monitoring of the identified risks and the effectiveness of controls applied to reduce the risks to an acceptable level, rests with senior management in the individual Lines of Service and Functions. The Management Board evaluates the effectiveness of the firm's system of internal quality control through reports of periodic reviews of performance and quality, which are carried out internally as well as independently by the PwC network and the firm's regulator in Cyprus.

Head of RCR

## ≡ Oversight Board

The Oversight Board, which is independent of the Management Board, is elected by the firm's partners for a two-year term of office and consists of four members all of whom are partners.

The Oversight Board generally meets on a bi-monthly basis but may hold additional meetings, if necessary, and issues biannual reports on its activities to the partners. It considers a wide range of issues for the firm such as risk, strategy, reputation, culture, people matters including health and wellbeing, technology, return on investments and more. It supports, gives guidance to, and challenges the Senior Partner and the Management Board. The Oversight Board has particular insight on the views of the partners of the firm and reflects those in conversations with management.

The members of the Oversight Board who have served during FY22 are:

**George Lambrou**  
Chairman of the  
Oversight Board,  
Advisory

**Michalis Tsikouris**  
PwC Legal

**Petros Maroudias**  
International Private  
Clients

**Zacharias Clerides**  
Head of International  
Private Clients

## During FY22, the Oversight Board, among others:

- has met 8 times. In addition, several ad-hoc meetings were held between the Oversight Board Chairman and the Senior Partner;
- received feedback from the Senior Partner on the financial performance, business developments and risk management issues affecting the firm;
- discussed the performance ratings of the members of the Management Board with the Senior Partner, determined the performance rating of the Senior Partner and ensured that the firm's policies and procedures concerning the determination of the partners' performance ratings for FY21 were performed properly; and
- assessed the effectiveness, independence and appointment of the firm's external statutory auditor.

## ≡ Partner remuneration policy

Partners are remunerated based on the Partner Income Framework (PIF), which is revised at regular intervals. The PIF that was in place during FY22 is comprised of the following three components:

Responsibility income - income reflecting the partners' role and responsibilities. The PIF recognises the following bands of responsibility pay:

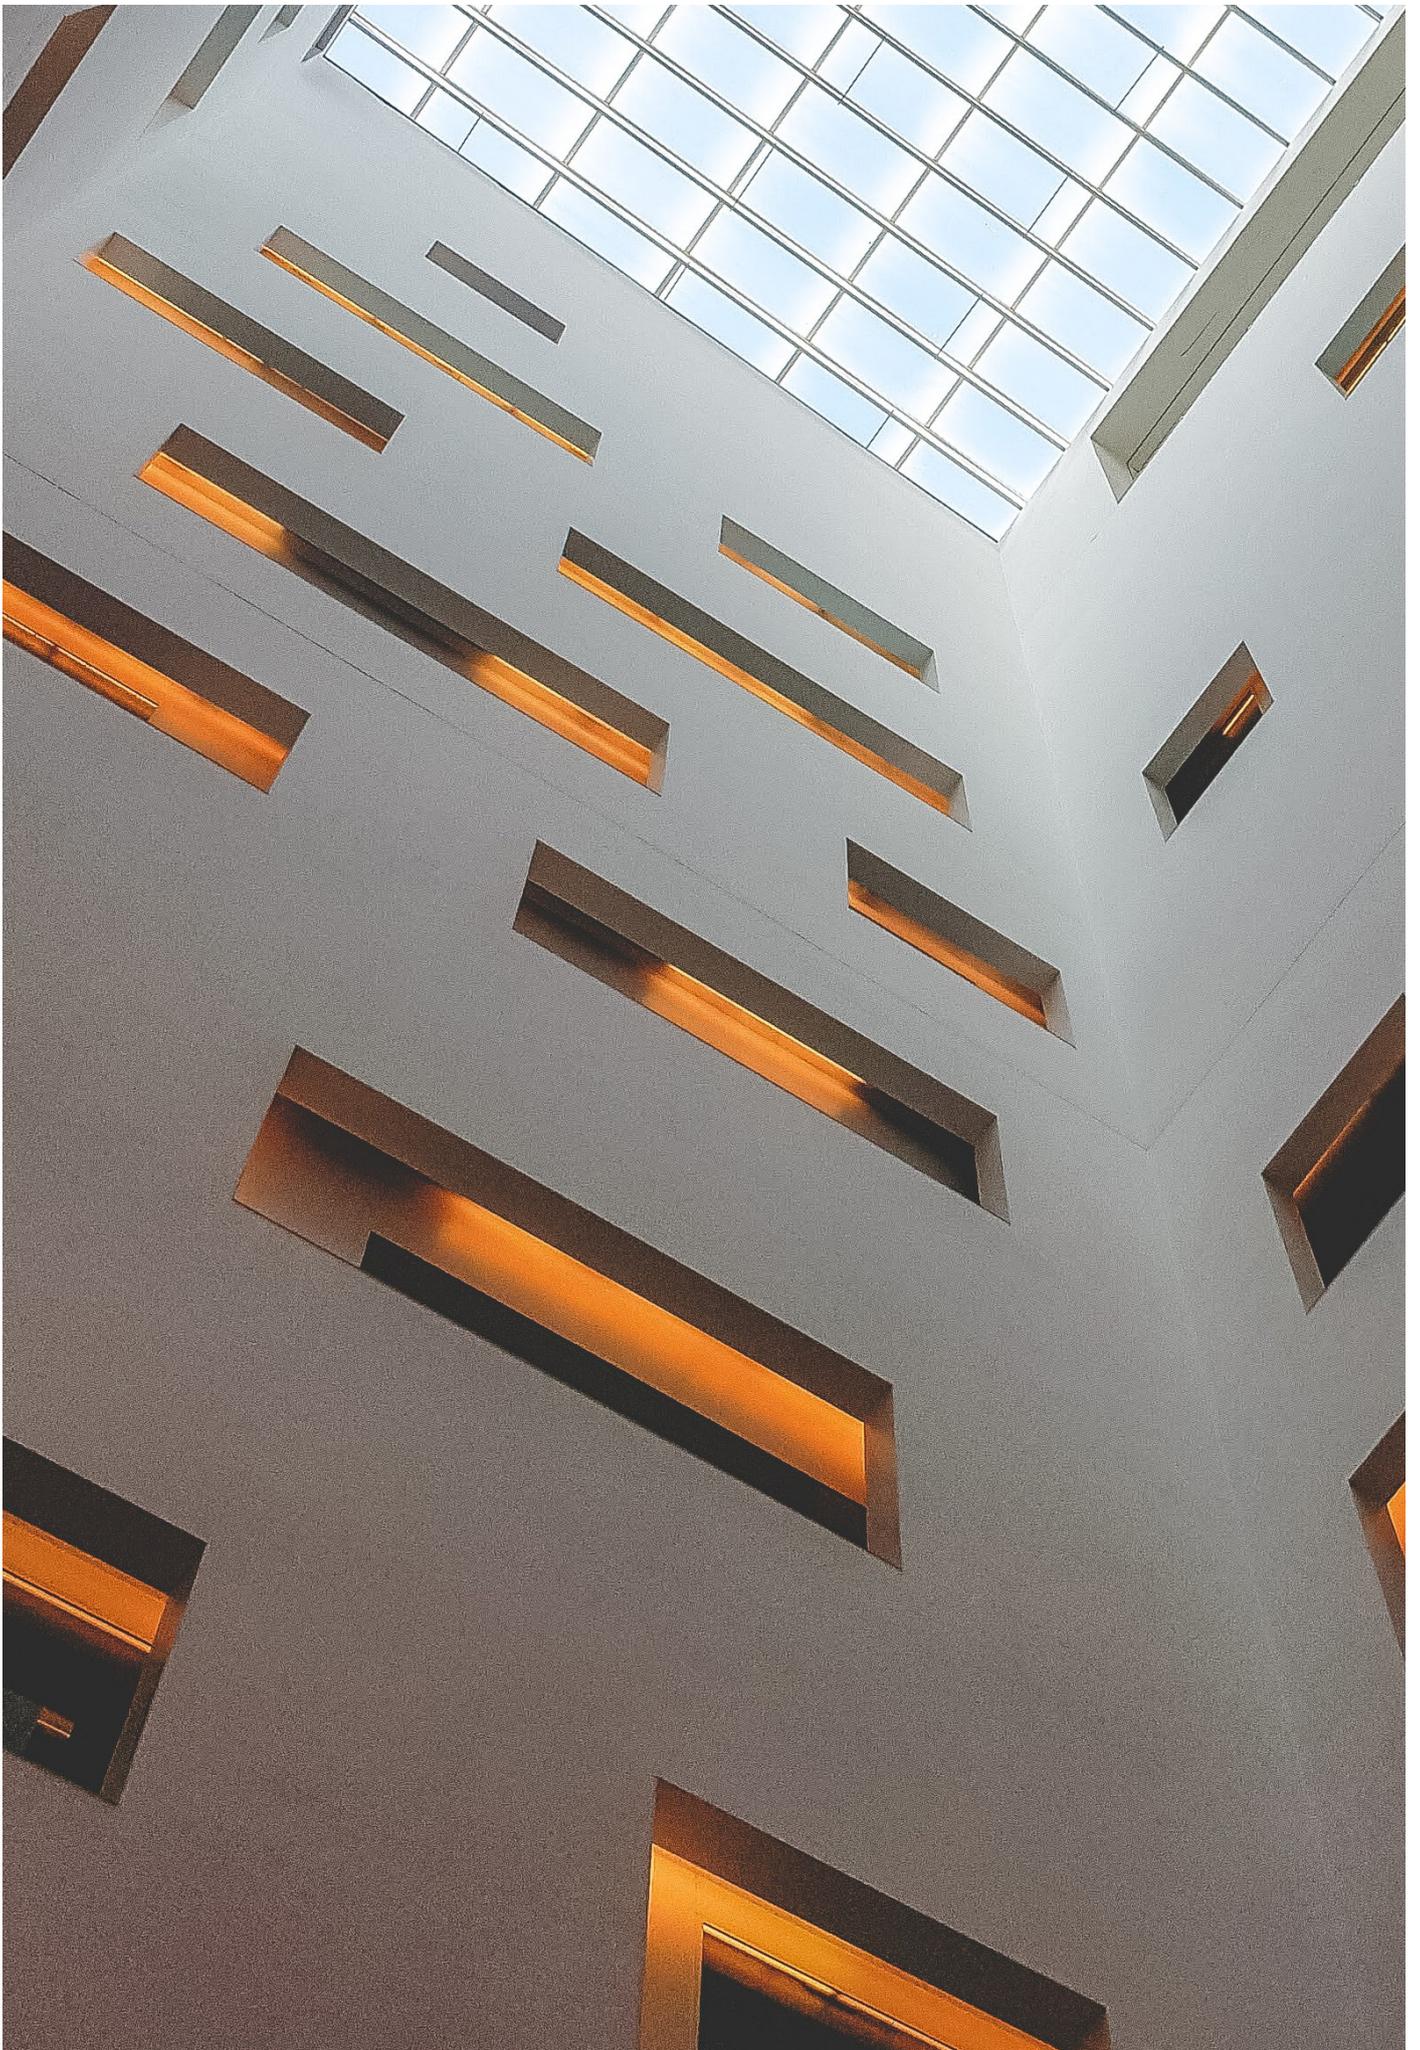

- Chief Executive Officer
- Members of Management Board
- Business Unit Heads and firm-wide Function Heads
- All other partners

Performance income - income reflecting the partner's performance based on the assessment of how each partner has performed, using a Partner Performance and Development System (PPDS). Within the context of the PPDS, each partner's performance income is determined by assessing achievements against an individually tailored set of objectives, based on the partner's role and responsibilities. These objectives include ensuring that we deliver quality services and maintain our independence and integrity.

Quality failings identified either through regulatory reviews or internal quality reviews impact the remuneration of partners, through an Accountability Framework. Key Audit Partners, whilst being responsive to client needs are not evaluated or remunerated for the selling of non-audit services to their audit clients. The PPDS adopts 4 performance ratings and a range of weights that gives the flexibility for fairer allocation of the performance income in accordance to partner performance and contribution.

Equity income - income reflecting each partner's share in the profits of the company. All our partners are equity partners. Each year, each partner receives an equal number of additional shares which results in the relative Profit Sharing Ratios (PSR) of newer partners increasing and consequently the PSR of long serving partners reducing.

The split of the income under the three components is aimed to be as follows: 44% responsibility income; 16% performance income and 40% equity income.

# Appendix 1:

## Public Interest Entities
